AEO-IM9000-V

Multifunction digital transmission cabinet for monitoring and maintenance

English · Revision EN-20261101-173

Cabinet material	Galvanized steel; other materials such as 304 or 201 stainless steel available on request
Material thickness	1.0mm; other thicknesses such as 1.2mm, 1.5mm and 2.0mm available on request
Mounting	Pole or wall mounting
Dimensions (H x W x D)	450 × 380 × 210mm
Standard installation accessories	Circuit breaker, 2P16A, with 10A/25A/32A options; power surge protection module, 2P40KA, with 20KA/60KA options; Chinese-standard 5-hole maintenance socket, 10A; LED maintenance light; door-status microswitch
Optional installation accessories	4G CAT1 communication module, temperature-controlled cooling fan and 4-port/8-port fiber splicing kit
Operating temperature	-40～85°C
Storage temperature	-40～85°C
Relative humidity	5%–95% (non-condensing)
Lock	Waterproof triangular-key lock; waterproof cabinet flush lock optional
Structural design	Rain-shedding hood structure
Surface finish	Powder coating
Cabinet color	Gloss white; other colors available on request

Intelligent operation and maintenance unit	1 x RJ45 management Ethernet port; 10/100M auto-detection; full/half duplex; auto MDI/MDI-X; IEEE 802.3 10Base-T, IEEE 802.3u 100Base TX and IEEE 802.3x Ethernet standards; WEB management and maintenance; remote upgrade; door-status detection interface; tilt and impact detection; surge protector status interface; built-in temperature/humidity sensor with real-time data; real-time operating-status indication; DC12V backup power output; IP camera status monitoring; detection of mains failure, network loss and breaker trips; real-time alerts for cabinet opening, tilt/impact, water ingress, abnormal temperature and power faults
Protection rating	IP56
Power output control unit	1 x AC220V output; remote on/off and power-cycle control; Chinese-standard 5-hole socket with online-status detection and voltage/current measurement; built-in fuse and surge protection, with short-circuit protection
